It's already been through OGC, but I'll let Quentin know RD should take a look.

Seems like RD should review this as well as OGC.

I don't have any thoughts on it, specifically since OGC has weighed in on it.

Elissa, Billy,

Please take a look at the attached draft response to a press inquiry on the treated seed petition and neonics from Bloomberg. It incorporates feedback from the PRD team, including myself, as well as OGC and EFED. Marianne and Melissa still want to chat with me this morning prior to sending it back to Quentin, but I wanted to ensure you had an opportunity to weigh in before that time. I'd also like to talk about it briefly in my general this morning.

Thanks,
Dana

Dana,

Attached is the response that Quentin just sent out which is the version with EFED and OGC's comments (treated seed questions.bp KS comments). In the meantime, Marianne and I had been working on a response. As a result, I have attached another version that is a hybrid of our (Marianne's and my version) and that from OGC and EFED. Please take a look and we can discuss tomorrow. Quentin is looking for a response by 9 am tomorrow.

Thanks,
Melissa

Hi again.

The attached Word doc reflects Bob Perlis's edits and comments and Keith Sappington's edits to the draft responses to Bloomberg. Feel free to use this for your edits. Please try to get them to me by 9am.

Thx

Subject: RE: Press responses for your immediate review: BNV - Treated Seeds/neonics

Thanks everybody.

I'm holding on the response. I never send them up without relevant division concurrence...I just nag more as my deadline approaches. ☺

Bob Perlis (OGC) will be sending his comments to me shortly. Keith Sappington has already chimed in for EFED, but I'm still waiting for Justin H and Tom S's contributions.

As you edit the responses, please keep in mind that OPA usually only sends out short answers (generally 3~4 sentences). If you've ever seen "science" articles on Bloomberg, that's the sort of English OPA likes to see in our responses (hence my Ex. 5 Deliberative Process (DP) characterization). But if you have a better idea for responding to his concern about pesticide overuse with treated seed, feel free to edit away.

Thx

Quentin,

Please wait for the rest of our team, specifically our team leader Marianne, prior to proceeding but this all looks generally fine to me. The one comment I have is your response to question 5 where you state,

Ex. 5 Deliberative Process (DP)

Thank you for your work on this and please feel free to let us know if you have any additional questions should they arise.

Importance: High

Hi.

Please review and edit if necessary my draft responses below to this Bloomberg reporter's questions on treated seed and neonics. Connie Hernandez (FEAD) is reviewing concurrently in a separate thread, since she has the lead on the treated article petition. I'm also reaching out to EFED's neonic team for comments/concurrence, specifically for Q4 &5.

This is due out of OCSPP IO around noon tomorrow, so please try to get your comments/concurrence back to me by 4pm today. If you can indicate PRD IO concurrence, too, that'd be helpful.

Thanks,

BNV
ADAM ALLINGTON
DDL WEDNESDAY 6 NOVEMBER

Good morning all,

Should we talk about how to handle this inquiry? Should we loop ORD in at any stage?

Thanks, R.

+++++

Hello Robert,

I hope all is well at your end.

So, I'm been working on investigative story about EPA's regulation of pesticide seed treatments for awhile. I now am in a position where I can present you with a complete list of the questions I have. Given the complexity and the amount of questions I have, I would ideally like to conduct a phone interview, both so I have the chance to completely understand the nature of the answers, but also have an opportunity to ask individual follow ups questions based on the responses. AND also to ensure EPA has the chance to adequately defend any specific criticisms from other groups.

I think we could address most of these questions in a 15-20 minute phone call.

Some of the questions I have are as follows:

1. A number of scientists, and environmental groups say that treated seeds treated seeds fit the legal definition of and are explicitly marketed as pesticides, and therefore should be regulated under FIFRA. What is the Agencies position? Do treated seeds not meet the bar to be considered pesticides?

EPA response:

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

2. Has the dramatic increase in the use of pesticide coated seeds over the last decade indicate that it may be time to revisit the treated article exemption, which currently exempts treated seed from registration and labeling requirements?

EPA response:

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

3. Some also claim that pesticide-coated seeds possess unique pesticidal and environmental fate properties that must be regulated under FIFRA to ensure adequate protection of the environment and public health. If EPA disagrees, what steps have they taken to ensure adequate protections from the specific risks posed by seed-coatings?

EPA response:

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

4. There is an increasing body of scientific studies that are pointing to broader environmental impacts of from neonic-coated seeds (besides pollinators). Is this something that is concerning from a risk analysis POV? Is EPA factoring these new studies into the re-registration review for neonics?

EPA response:

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

weight loss in certain birds noted in the study has also been documented in the neonicotinoid risk assessments EPA released in 2017.

5. Is there any concern that the massive use of treated seeds (particularly corn, soybeans and wheat) have led to the overuse of pesticides, and that this might exacerbate problems such as endangered species exposure, or weed resistance?

EPA response:

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

Again, I know these aren't cut-and-dry type answers. If you'd prefer to answer each individual questions directly via email, that is fine with me. But, as I said, a phone call with the relevant subject matter expert seems like it might be the easiest. I'm shooting to have responses for this by COB on Wednesday.

Many thanks, Robert.

Best,
Adam
